### LETTER OF RECOMMENDATION

It is a joy and honor for us, as local public administration, to recommend RCE 'Children's Hope' to everyone who wants to honestly support the future existence of this organization.

RCE 'Children's Hope' is a Christian organization with a significant impact on the life of the local community. In the 26 years, it succeeded, at a high standard of competence, professionalism, work, discipline, hope, commitment and especially faith, to provide material, financial, emotional and educational support for the integration into a normal life for children in risk of family and school abandonment, for those with special needs, disabled, restoring not only the lives of children, but also the families, providing them with the security of a decent level of living and support for a dignified social life.

Where the family was shattered, the organization took over the responsibility of growing and educating the abandoned children and their support for an integration into an independent life, providing them with a home, a loving family, where they found protection, kindness and mercy, the hope for a future they had never dreamed of and faith in God.

Many of the children grown and educated by RCE 'Children's Hope' are high-school and even college graduates, they have jobs, a family, they live a full life, being themselves a support for the society where they are integrated as people with potential, capable to built a future for the country.

Speaking about the education of these children, we consider that the accreditation that the Romanian State has granted after years of strict monitoring and which was obtained by this organization for the primary and secondary education levels, represents a huge success, a true national acknowledgement of the considerable effort, seriousness, perseverance, values and high principles that the mission of RCE 'Children's Hope' is built on.

The diversified social services offered to poor children and families are licensed, with the compliance of the legislation in force, the organization having competence and expertise in this field.

After years of involvement in the life of the local community, RCE 'Children's Hope' has proved a huge potential in changing for the better and for the rest of the life not only the lives of poor, disabled, special need children, but the entire existence of their families and, moreover, it has created the grounds of developing new families, to live a life guided by high moral principles and values.

We distinctly appreciate the way RCE 'Children's Hope' has understood and made proof that its mission to provide material, social, educational, family support to special needs children, the abandoned and of those coming from social risk families, is not politically and religiously conditioned.

Beyond applause and the acknowledgement of the community and of those whose life was saved, all these efforts need a permanent, consistent substantial financial and material support. In this context of understanding the need of financial support, we present this recommendation to be useful to the organization in view of obtaining financing from the institutions and bodies willing to be generously involved in the high mission that RCE 'Children's Hope' has taken over responsibly, skillfully and highly morally.

Respectfully,

**MAYOR**  
**Calin BIBART**
